

# SL-3

SENSOR

## Vibration (Shaker) Sensor Line

- Adjustable super sensitivity
- Maintenance free
- Positive Attitude Recognition (PAR)<sup>™</sup>
- Automatic self-cleaning contact points
- Suitable for any type of fence or wall

# SL-3

SENSOR

The **SL-3** Multidirectional Vibration (shaker) Sensor Cable is a patented system which supersedes and outperforms all types of fence sensor technologies.

**SL-3** Multidirectional vibration (shaker) sensor cable is an advanced, highly reliable intrusion detection system. Its unique capability provide for super sensitivity and accurate responses to vibrations caused by intrusion attempts.

The **SL-3** sensor cable is factory pre-assembled with sensors at 3 meter (10') intervals. Installation of the **SL-3** Sensor Cable is fast and simple to install, as it is supplied ready for mounting to any new or existing type of perimeter barrier such as; chain link, welded mesh, razor tape coil, concrete or block walls and roof-tops.

Due to its advanced design and configuration, the field proven **SL-3** Sensor Cable has a high Probability of Detection (Pd) rating and an extremely low False Alarm Rate. The **SL-3** sensor cable is maintenance free and warranted to be free from defect and/or sensor failure for a period of not less than 10 years.

## SPECIFICATIONS:

- **Operating temp:** -45°C (-49°F) to +70°C (+158°F).
- **Capsule Enclosure:** Injection molded high resistant plastic
- **Size of capsule:** 69 x 42 x 30mm (2.7" x 1.65" x 1.18")
- **Weight:** 50 gram.
- **Comm. Cable:** Shielded AWG gauge six conductor cable.
